

## PRESS RELEASE

### **Energy Efficiency Act: Reach Austrian Energy Providers via exite®**

**EDITEL provides connection to the EDI network of the EDA, the Association of Austrian Electric Utility Providers, via eXite®.**

(Vienna, 24/03/2016) Energy efficiency is a big issue not only when it comes to global climate-related goals, but also as a cost factor for businesses. The Austrian Energy Efficiency Act now requires businesses of a certain size to make this issue even more of a priority. That is why consumption data play a key role because they help quantify prescribed energy savings. In addition, associated electronic invoices allow for the optimization of processes.

EDITEL has created a connection to EDA, the EDI network of the Association of Austrian Electric Utility Providers, providing access to all Austrian energy providers via eXite®. This has laid the groundwork for users to be able to receive electric utility invoices and pertinent consumption data via eXite®.”
