EDI-additional module for Sage Office Line

From now on, Business Software sells its Sage Office Line ERP-System with integrated EDI interface to the EDITEL eXite® platform. Companies can exchange electronic documents via EDI in a simple and uncomplicated manner and integrate them smoothly into their business processes.

(Vienna, 29 September, 2015) In many industries, the electronic exchange of business documents (Electronic Data Interchange - EDI) between business partners has increasingly become a prerequisite for managing business processes efficiently. In order to guarantee a higher degree of automation in this context, the ERP solution Sage Office Line now provides an additional EDI module, which allows the simple integration of Electronic Data Interchange.

The EDI interface was developed in cooperation with the experienced EDI provider EDITEL. "The enhancement enables our customers to access the EDI platform eXite® by EDITEL and consequently they can contact more than 15,000 companies from various industries. With this, we respond to our customer's growing demand regarding an EDI integration", says DI Johannes Schwaiger, CEO of Business Software GmbH.

Without a great deal of effort, the additional EDI module can be integrated into ERP solutions that already exist or are to be newly implemented. Ranging from electronic orders, delivery notes, supplier data, invoices to price lists or production data, any kind of information can be exchanged and processed automatically in a protected and transparent way in real time.

"For more than 30 years, EDI has been supporting many business sectors such as consumer goods, do-it-yourself (DIY), catering, the hotel industry, logistics, sporting goods, the pharmaceutical industry as well as financial institutions; it has been providing automated and clean processes along the entire supply chain. The additional EDI module by Sage Office Line contributes to flawless and efficient business transactions resulting in a higher level of customer satisfaction", reports Mag. Peter Franzmair, CEO of EDITEL Austria.

More information is available in the Sage EDITEL information leaflet or online: www.editel.eu/solutions/edi-integration.

PRESS RELEASE

About EDITEL

EDITEL is a leading international provider of EDI solutions (Electronic Data Interchange) specialized in the optimization of supply chain processes across businesses and industries.

With its headquarters in Austria and subsidiaries in the Czech Republic, Slovakia, Hungary and Turkey as well as a large number of franchise partners, EDITEL has a cross-border presence and reach, which makes it a perfect choice for corporations with international activities.

Via the EDI platform eXite®, EDITEL offers a comprehensive range of services, from EDI communication and EDI Integration to Web EDI for SMEs, e-Invoicing solutions and Digital Archiving to Business Monitoring. Thanks to 30 years' experience and expertise, EDITEL successfully implements even large-scale EDI projects.

About Business Software

Business Software GmbH is the exclusive licensee of Sage Germany. The team members from marketing, training and support focus on meeting the requirements of Austrian licensees of Sage software products. By means of regular adaptations, the local product management ensures that the commercial software, which was developed, tried and tested in Germany, complies with the legal provisions of the Austrian market. With regard to future programme development, any kind of suggestion made by users will be forwarded to the Sage software developers in order to make applications even more practice-oriented. Throughout Austria, Business Software GmbH cooperates with a nationwide network of regularly trained and authorised specialist retailers, who act on-site and as close to the customer as possible.
